

Jeremiah Jacob – Data Analytics Portfolio

About Me

Hello,

I'm Jeremiah Jacob, a Statistics graduate transitioning into Data Analytics. My professional background spans Customer Experience, Investment Advisory, and HR Compensation & Benefits, where I developed strong analytical, reporting, and problem-solving skills.

To strengthen my technical expertise, I have been building practical projects using Microsoft Excel, SQL and Power BI and am currently expanding my skills in Python.

This portfolio contains a selection of my Excel projects demonstrating data cleaning, analysis, reporting, visualization, and business decision support.

Projects

1. HR Dashboard

Objective

Design an interactive HR dashboard to summarize key workforce metrics.

Skills Demonstrated

- PivotTables
- PivotCharts
- Slicers
- KPI Cards
- Conditional Formatting
- Data Visualization

Key Insights

- Employee KPI tracking
- Department performance comparison
- Salary analysis
- Attendance trends

2. Power Query Basics

Objective

Clean and transform raw HR data using Excel Power Query.

Tasks Performed

- Imported raw dataset
- Removed duplicate records
- Corrected data types
- Split columns
- Filled missing values
- Loaded cleaned data into Excel

Skills Demonstrated

- Power Query
- Data Cleaning
- Data Transformation
- Data Preparation

3. What-If Analysis

Objective

Analyze different salary increase scenarios for payroll planning.

Excel Features Used

- Goal Seek
- Scenario Manager
- One-Variable Data Table

Business Application

This project demonstrates how Excel can support budgeting and HR decision-making by modeling different salary increase scenarios and comparing their financial impact.

Technical Skills

- Microsoft Excel
- Power Query
- PivotTables & PivotCharts
- Dashboard Design
- Data Cleaning
- Data Visualization
- What-If Analysis
- XLOOKUP
- INDEX/MATCH
- SUMIFS
- COUNTIFS
- Conditional Formatting

Currently Learning

- Python
